

## Cabin Fever: 10 woodsy cabins you can rent out

November 28, 2016

By Katie Jackson

Long before the tiny-homes craze there was a fondness of log cabins. In 1916, John Lloyd Wright (son of the famous architect Frank Lloyd Wright), invented Lincoln Logs. In creating this National Toy Hall of Famer, Wright brought the cabin concept into every other American living room. The first set even came with instructions on how to build Uncle Tom's Cabin and Abraham Lincoln's abode.

A century later, our cabins can be accused of being too contemporary. However, they still conjure up feelings of comfort and a connection to nature. Whether you're already a cabin living enthusiast or you're just bored with hotel rooms, here are 10 cabins worth escaping to this winter.

### Civil War-Era Cabin

Travel back to the 1860s at this cabin built of beams repurposed from historic square-hewn log homes that survived the Civil War. One of the rental properties available at Missouri's Top of the Rock resort, the 1,100-square-foot labor of luxury and love—the work of Amish craftsman and local carpenters—has commanding views of the Ozarks and Table Rock Lake. It's a two-story home where good things come in twos. There are two master bedrooms, two bathrooms and two grand porches with golf course views. The hardest part of staying here is deciding whether to soak in the traditional copper tub or to stand under the stars in the outdoor shower made of stone. The Civil War-era cabin is bookable through Big Cedar Lodge for \$500/night.
